FULL STACK DEVELOPMENT PROJECT

ZORVIQUE

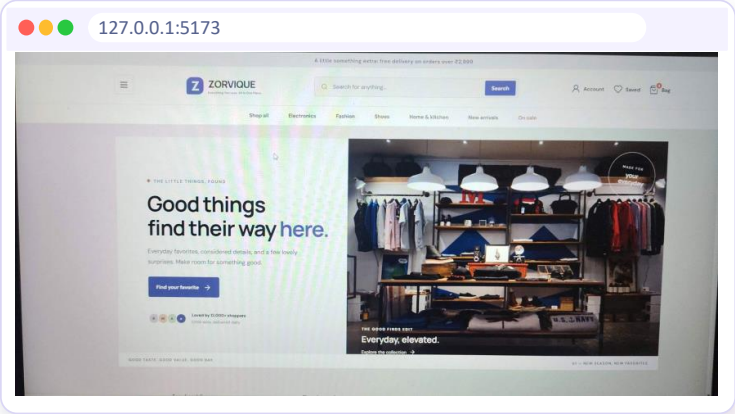

Everything You Love, All in One Place.

Student Name: V.Thambi Babu

Roll Number: 24KT1A05P1

Department: Computer Science and Engineering

College: PSCMR COLLEGE OF ENGINEERING AND TECHNOLOGY

Full Stack Development (FSD-2) | E-Commerce Website

Introduction

What is e-commerce?
Buying and selling products online

What is ZORVIQUE?
A modern online store for everyday finds

Why we built it
A hands-on full-stack project with React and Express

Why online shopping matters
Shop any time, with wider choice and easy comparison

116 products in the shop

6 pages: Home, Shop, Login, Saved, Compare, Bag

4 products can be compared side by side

Problem Statement

Traditional shopping limits

Travel, fixed timings and limited stock in one shop

Hard to find products

Too many items and no quick way to narrow them down

No easy comparison

Comparing products side by side takes time and effort

Need a friendly platform

Shoppers want a simple, organised online store

Objectives

01

Responsive website

A clean, modern layout built with React

02

Easy browsing

Categories, search and sorting to find items fast

03

User authentication

Sign in and create an account

04

Wishlist and compare

Save favourites and compare up to four products

05

Simple shopping

A short path from browsing to the bag

Technologies Used

HTML
Page structure

CSS
Styling and layout

JavaScript
Logic and interactivity

React.js
Component-based UI

Vite
Fast dev server and build

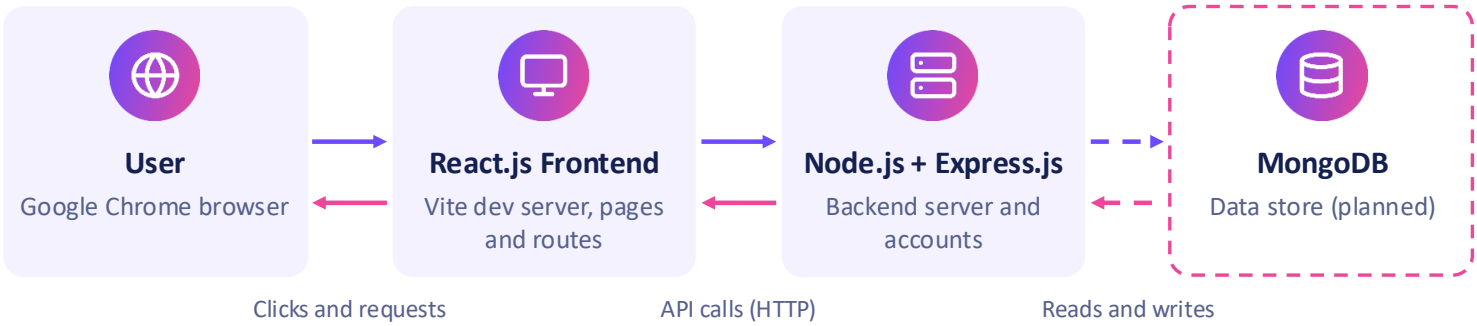

Node.js
JavaScript runtime

Express.js
Backend server and routes

MongoDB
Database (planned)

Visual Studio Code
Code editor

System Architecture

1. User opens ZORVIQUE in Chrome. React renders the pages: /shop, /login, /wishlist, /compare, /cart.
2. React sends requests to the Express server, for example to sign in or create an account.
3. Express handles the request and returns data as JSON. A MongoDB database is the planned data store.

Home / Shop Page

Navigation bar
Logo, Account, Saved, Compare and Bag

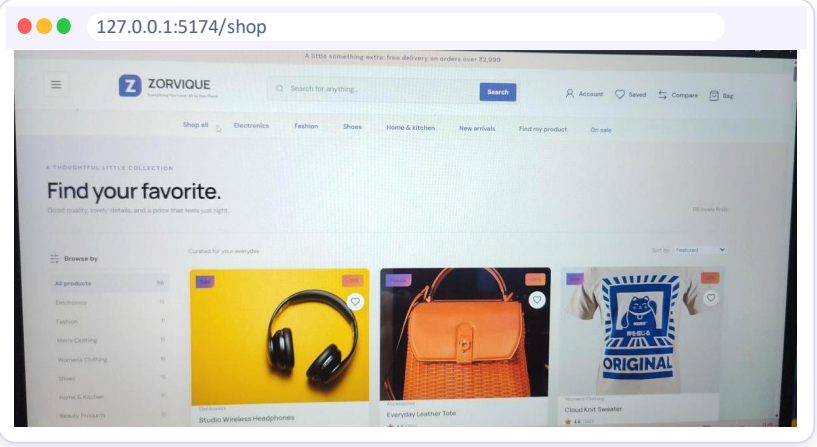

Search bar
Search for anything, with a Search button

Category menu
Electronics, Fashion, Shoes, Home & kitchen

Browse by sidebar
Category list with item counts, 116 in total

Product cards
Image, badge (Sale, New, Popular), heart icon

Ratings and sorting
Star rating and a Sort by Featured menu

Also on this page
A promo banner announces free delivery on orders over ₹2,999.

User Login Page

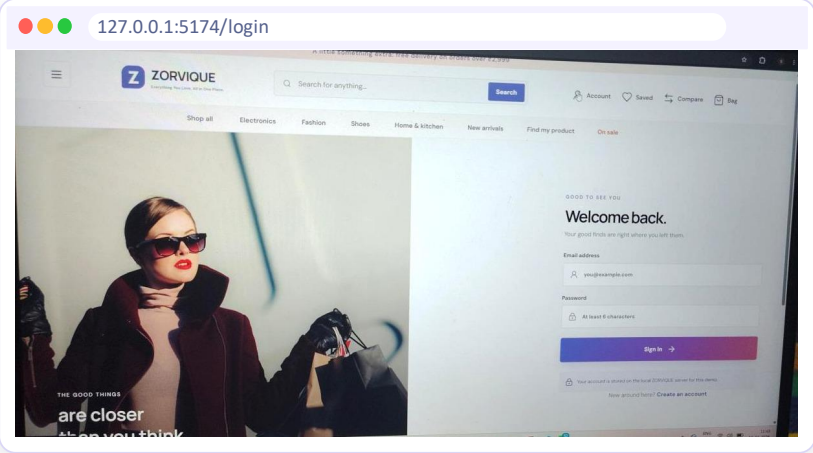

Welcome back
A friendly sign-in screen for returning users

Email address field
Placeholder shows you@example.com

Password field
Hint: at least 6 characters

Sign in button
Purple-to-pink gradient call to action

Create an account
Link for new users to register

Note shown on the page
Accounts are stored on the local ZORVIQUE server for this demo.

Wishlist Module

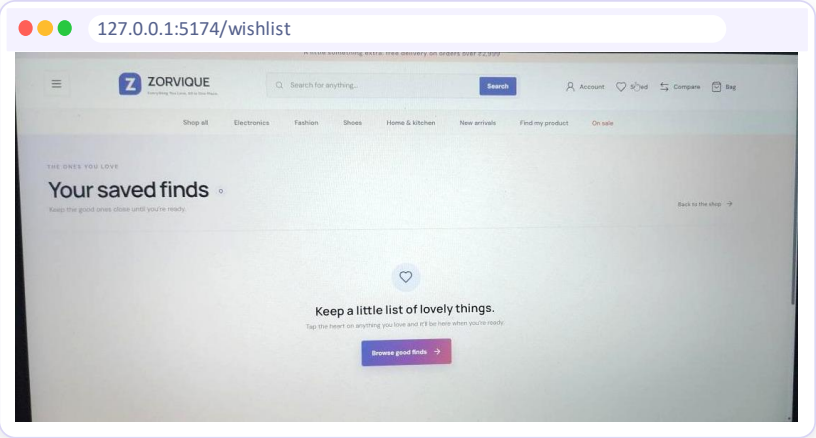

Saved finds page
Title 'Your saved finds' with an item counter

Heart on product cards
Tap the heart on any product to save it

Empty wishlist screen
Friendly message when nothing is saved yet

Browse good finds
Button that takes the user back to the shop

Saved in the navbar
One click from every page

How to explain it
Save products now, come back later, and decide when you are ready.

Product Comparison Module

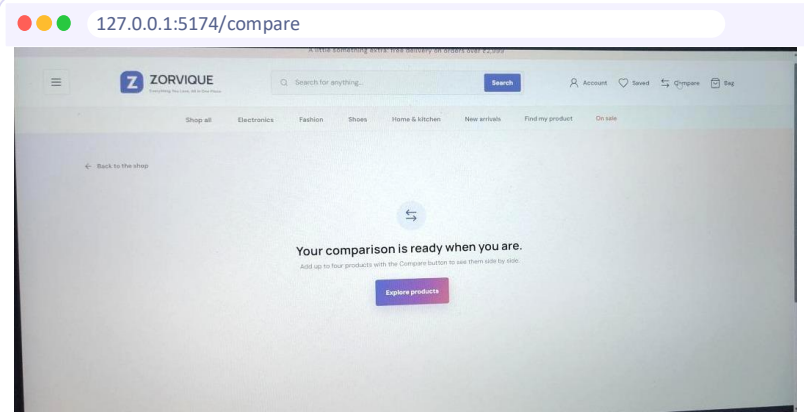

Compare in the navbar
Open the comparison page from any page

Compare button
Add products from the shop with Compare

Up to four products
Shown side by side on one screen

Empty comparison screen
'Your comparison is ready when you are.'

Explore products
Button that opens the shop to add items

How to explain it
Pick up to four products, then compare them side by side before buying.

Shopping Cart Module

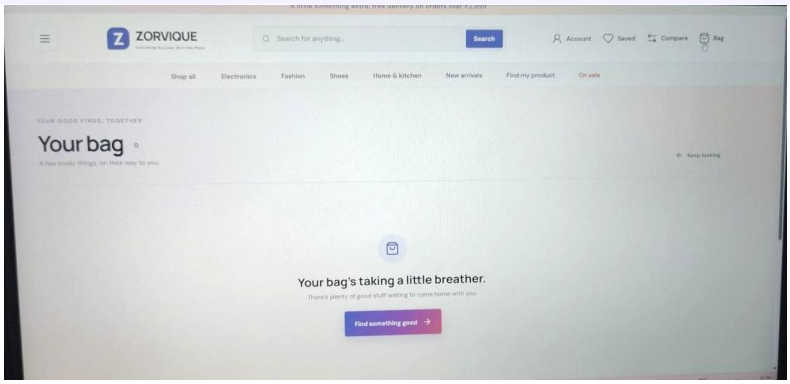

Your bag page
Heading 'Your bag' with an item counter

Empty bag screen
'Your bag's taking a little breather.'

Find something good
Button that returns the user to the shop

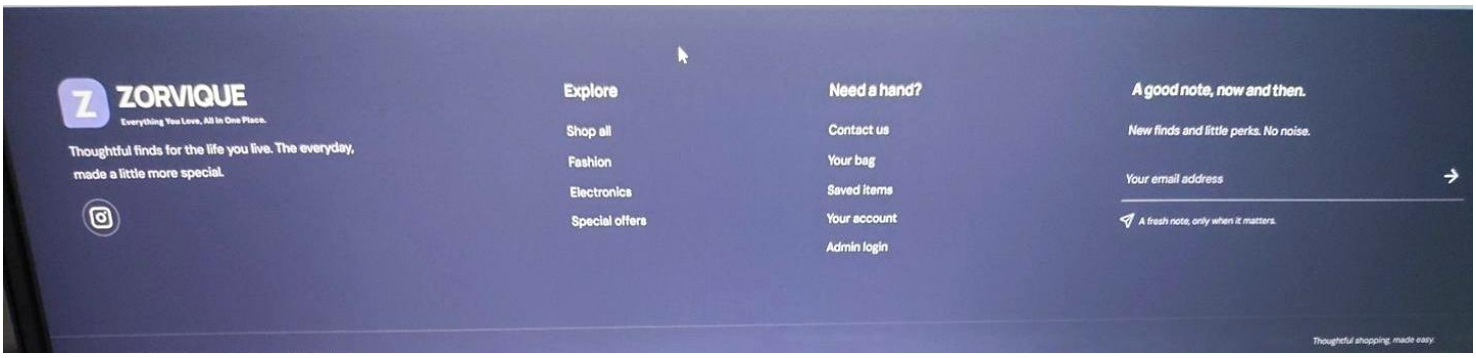

Keep looking link
Quick way back to browsing

Bag count in the navbar
A badge shows the number of bag items

Seen on the home page
The Bag icon shows a red badge with the item count after adding items.

Website Footer

Branding

Logo, tagline and a short brand line

Navigation links

Explore: Shop all, Fashion, Electronics, Special offers

Help links

Contact us, Your bag, Saved items, Your account, Admin login

Newsletter

Email box with a send arrow and Instagram link

Advantages and Applications

Easy product discovery
Categories, search and sorting

User-friendly interface
Clean and consistent design

Organised categories
Browse by list with item counts

Convenient shopping
Saved, Compare and Bag in one bar

Better product selection
Compare up to four products

Where it can be used

Small online store

Learning model for full-stack apps

Base for a larger shop

Future Enhancements

Available now

- Product browsing and categories
- Search bar and sorting
- Login and create account
- Saved (wishlist) page
- Compare up to four products
- Shopping bag page
- Newsletter sign-up form

Future enhancements (not built yet)

- Online payment gateway
- Order tracking
- Admin dashboard
- Advanced product filtering
- AI-powered product recommendations
- Customer reviews and feedback
- Mobile application

Conclusion

Project summary
ZORVIQUE is a modern e-commerce website with browsing, login, Saved, Compare and Bag pages.

Skills gained
React.js, Vite, Node.js, Express.js, UI design and routing.

Why full-stack matters
Front end and back end work together to deliver a complete product.

Thank You

ZORVIQUE

Everything You Love, All in One Place.
